**"...the car had been
to the main-dealer
four times"**

Evolving software for evolving engines

Jim Quirke of Millenium Jaguar, Croydon has been using Autologic for over a year and remains convinced that it is the most comprehensive diagnostic package on the market.

Jim claims that with Autologic's help, his garage regularly outperforms the main-dealer. The most memorable occasion concerns a 4 Lt S Type which had intermittent gear-box problems for over a year. Jim recounts, "the car had been to the main-dealer four times after going into limp-home mode. Each time different work was carried out but the problem came back. When they brought it to us, we immediately hooked it up to Autologic and soon realised the problem was with the body processor. We replaced the part, but the difficulty was in making it talk to the rest of the car. We called the Autologic technical hotline and spoke to Jaguar Software Engineer Pete Thomson, who worked late to write additional software, allowing us to complete the service. The car now performs amazingly and the owner is over the moon!".

Autologic's service continually goes beyond Jim's expectations, "with new models released all the time, there is always an unprecedented problem to contend with. I know that Autologic software is adapted to meet every new need – and often on the same day!".

Additional software

New dealer-level software for Mercedes-Benz, BMW, Land Rover, Volvo, VAG and Porsche vehicles has been designed to run on the same platform as Autologic® for Jaguar, offering multi-marque specialists complete servicing capability.
