“....the best
diagnostic kit
on the market...”

Helping independents keep their independence!

Arne Nakstad of Moan Auto A/S in Levanger, Norway was one of the first to use new Autologic for Volvo. He had never used Autologic before but the system's reputation was strong enough for him to recognise the benefits the software could bring to his business, "I'd heard of Autologic through trade magazines and since we do a lot of work on Volvo vehicles, trying the new Volvo software seemed like a great opportunity" he said.

In Arne's view Autologic certainly lived up to its reputation, "I've found the system great to work with. The handheld hardware is really convenient and the technical helpline means I have advice from a master technician available if necessary".

Ultimately it's the freedom that Autologic brings to his business that pleases Arne most, "In my opinion Autologic for Volvo is the best diagnostic kit on the market and a fantastic alternative to Volvo's own system. We can now test and programme vehicles that we would have had to send to a main dealer in the past. Being self-sufficient like that means we have far more control over the service we offer our customers, and the prices we charge them – I don't know how I managed without it".

Additional software

New dealer-level software for Mercedes-Benz, Jaguar, Land Rover, BMW, VAG and Porsche vehicles has been designed to run on the same platform as Autologic® for Volvo, offering multi-marque specialists complete servicing capability.
