makes Autologic
second to none..."**

New Volvo software proves a hit!

Bill Boyle of Boyle's Foreign Car Repair in Washington, USA was introduced to Autologic through a friend at Eurodiagnostics and is now a loyal fan. He therefore eagerly took up the opportunity to try new Autologic for Volvo, "Knowing the difference Autologic for BMW and Mercedes-Benz had made to my business, I wanted to see what Autologic for Volvo could do" he said.

Bill remembers putting the system to work, "A customer brought her Volvo 01 Cross Country vehicle in with a faulty transmission – a chance to use Autologic for Volvo". The fault was unclear so Bill called the technical helpline and spoke to Volvo master technician Chris Dowling. "After I described the problem Chris helped me identify the fault and wrote a bespoke piece of software that I could download immediately from the Autologic website – it fixed the fault in no time. Service like that makes Autologic second to none."

Bill couldn't be happier with the software, "Autologic for Volvo really does its job. The owner of the Volvo 01 Cross Country was over the moon with the Autologic service – and the money she saved using her local workshop".

Additional software

New dealer-level software for Mercedes-Benz, Jaguar, Land Rover, BMW, VAG and Porsche vehicles has been designed to run on the same platform as Autologic® for Volvo, offering multi-marque specialists complete servicing capability.
